

VETT Technologies Robocall Mitigation Plan (Rev-Q2'26)

Date: 3-24-26

Entity Name: VETT Technologies LLC

FCC Registration Number (FRN): 0038207403

1. Introduction and Purpose

This Robocall Mitigation Plan ("Plan") is submitted by VETT Technologies ("Company") pursuant to **47 C.F.R. § 64.6305**. As a non-facilities-based voice service provider utilizing the SkySwitch platform, the Company is committed to taking all reasonable steps to avoid originating illegal robocalls and to maintaining the integrity of the voice network.

2. Know Your Customer (KYC) Protocols

The Company implements the following procedures to vet customers before providing service:

- **Identity Verification:** We verify the legal identity of all new business subscribers through tax IDs (EIN), business registration records, and physical address confirmation.
- **Traffic Profile Evaluation:** We interview new customers regarding their intended use of the service to identify and flag high-risk traffic profiles, such as high-volume automated dialing.
- **Contractual Compliance:** Our service agreements explicitly prohibit the use of our network for originating illegal robocalls, spoofed calls, or any activity that violates the TRACED Act.

3. Network Monitoring and Technical Mitigation

In coordination with our upstream provider, SkySwitch, the Company monitors traffic for indicators of illegal activity:

- **Analytics:** We utilize automated tools to detect patterns consistent with illegal robocalling, including high-volume, short-duration call bursts and high call-completion failure rates.
- **Filtering:** We screen outbound calls against "Do Not Originate" (DNO) lists to block calls from invalid, unallocated, or unused numbers.
- **Immediate Investigation:** Any account flagged for suspicious traffic is subject to immediate service suspension pending a manual investigation.

4. Traceback Cooperation

The Company fully cooperates with the Industry Traceback Group (ITG), the FCC, and law enforcement.

- **Response Commitment:** We commit to responding to all traceback requests within **24 hours** of receipt.
- **Primary Traceback Contact:** James Polk/CTO, rmd@televett.com, 214-283-8388.

5. STIR/SHAKEN Implementation

The Company has implemented the STIR/SHAKEN framework on its network.

- **Authentication:** Calls are authenticated using the Company's own **Service Provider Code (SPC) token**.
- **Pending Token:** The Company is currently in the process of obtaining its Service Provider Code (SPC) token and will update this filing upon receipt.
- **Attestation:** Through the SkySwitch platform, calls are signed with the highest possible attestation level based on our verified knowledge of the subscriber's identity and right to use the telephone number.

6. Declaration

I, an officer of the Company, certify under penalty of perjury that the information contained in this Robocall Mitigation Plan is true and accurate to the best of my knowledge.
