

Telephonics Unlimited, Inc.

Robocall Mitigation Program Certification

1. STIR/SHAKEN Deployment Status

Telephonics Unlimited, Inc. has implemented STIR/SHAKEN on all IP-based network segments capable of supporting authenticated caller ID. For any remaining non-IP or legacy paths, the company maintains all mitigation practices required for networks not fully capable of STIR/SHAKEN.

2. Robocall Mitigation Practices (47 CFR §64.6305(d)(ii))

Telephonics Unlimited, Inc. has implemented a comprehensive mitigation framework consisting of:

- Know-Your-Customer (KYC) vetting procedures to validate customer identity and intended use.
- Continuous call analytics and traffic monitoring to identify abnormal or high-risk call patterns.
- Immediate actions such as blocking, suspending, or disconnecting customers involved in illegal robocalls.

3. Traceback Cooperation Requirement (47 CFR §64.6305(d)(iii))

Telephonics Unlimited, Inc. commits to full cooperation with all traceback requests from the FCC, law enforcement, and the Industry Traceback Group (ITG), including timely and complete responses.

4. RMD Certification & Compliance

Telephonics Unlimited, Inc. certifies this mitigation program in the FCC Robocall Mitigation Database and maintains accurate CORES registration information, updated within the required regulatory time frame.
