2. Company Overview

ONSIM LTD is a UK-based telecommunications provider offering business voice and mobile services to enterprise customers. The company provides legitimate person-to-person communications and does not originate or facilitate robocalling, auto-dialling campaigns, or unsolicited bulk traffic.

3. Robocall Mitigation Measures

ONSIM LTD applies appropriate measures to prevent the origination of illegal or unwanted traffic, including:

- Customer verification (KYC) prior to service activation
- Services provided only to verified business customers
- No support for auto-dialling or mass outbound calling campaigns
- Monitoring of traffic patterns for anomalies or high-volume behaviour
- Enforcement of acceptable use policies prohibiting robocalling and spam
- Rapid response to abuse reports, including suspension of offending accounts

4. Traffic Profile

Traffic originates from individual assigned users (e.g. SIM-based services) and consists of legitimate person-to-person business communications only.

5. STIR/SHAKEN Status

ONSIM LTD is a foreign-based provider and is not subject to STIR/SHAKEN implementation obligations under 47 CFR § 64.6301.

6. Regulatory Compliance

ONSIM LTD complies with 47 CFR § 64.6305 by maintaining a robocall mitigation program and taking reasonable steps to prevent the origination of illegal robocalls.
