

MORnet Communications, LLC Robocall Mitigation Program

Effective Date: April 17, 2026

MORnet Communications, LLC is a newly registered interconnected VoIP provider based in Lake Wales, Florida. We are currently in the process of implementing full STIR/SHAKEN call authentication. In the interim we have established the following robocall mitigation program:

- 1. Customer Verification — We will only provide service to verified customers who have completed our customer onboarding process including identity verification.*
- 2. Traffic Monitoring — We will monitor our network for unusual call traffic patterns that may indicate robocall or spoofing activity.*
- 3. Traceback Cooperation — We commit to responding fully and within 24 hours to all traceback requests from the FCC, law enforcement, and the Industry Traceback Group.*
- 4. Immediate Action — We will take immediate action to investigate and terminate service to any customer found to be originating illegal robocall traffic.*
- 5. Upstream Provider Verification — We will only accept call traffic from known and verified upstream wholesale carriers.*
- 6. STIR/SHAKEN Implementation — We are actively working to implement full STIR/SHAKEN compliance including obtaining our STI certificate from iConnectiv and configuring our call signing infrastructure. We will update this filing upon completion of full implementation.*
