Business Overview:

Stratum Carrier LLC provides VoIP and wholesale voice services globally, supporting inbound and outbound traffic with a focus on compliance and quality routing.

STIR/SHAKEN Implementation:

The company implements STIR/SHAKEN for IP-based traffic where applicable and ensures proper caller authentication.

Traffic Monitoring & Mitigation:

Traffic is continuously monitored using automated systems to detect suspicious patterns, high call volumes, or irregular behavior. Non-compliant traffic is blocked immediately.

KYC & Customer Vetting:

All customers undergo KYC verification including identity, business validation, and intended traffic use-case before activation.

Traceback & Response:

The company cooperates with traceback requests and responds promptly to any regulatory or industry inquiries.

Conclusion:

Stratum Carrier LLC maintains strict compliance policies and actively works to prevent illegal robocalls and protect network integrity.
