1. PROGRAM OVERVIEW & OPERATIONAL PURPOSE

Bentarix Technologies LLC ("Bentarix") maintains a fully compliant Robocall Mitigation Plan (RMP) in complete alignment with rules established by the Federal Communications Commission (FCC). As an entity operating under **FRN 0038313128**, **FCC 499 Filer ID 838933**, and **OCN 433M**, Bentarix is committed to enforcing stringent operational controls to mitigate illegal robocalls, caller ID spoofing, and unlawful voice traffic origination across telecommunications networks.

2. CUSTOMER VERIFICATION & KYC PROTOCOLS

To prevent bad actors from accessing network infrastructure, Bentarix enforces strict Know Your Customer (KYC) onboarding standards for all wholesale, gateway, and enterprise communications accounts:

- Entity Identification:** Validation of legal business formation, corporate state filings, tax identity (EIN), physical operating addresses, and authorized company representatives.
- Use Case & Call Profile Auditing:** Screening customer traffic profiles, high-volume dialer campaigns, and verifying legitimate consent/opt-in mechanisms.
- Service Suspension Protocols:** Strict contractual terms permitting immediate call blocking or account suspension upon detection of unapproved, high-risk, or fraudulent traffic streams.

3. STIR/SHAKEN FRAMEWORK & AUTHENTICATION

Bentarix adheres to mandatory call authentication frameworks in compliance with federal regulations and STIR/SHAKEN standards:

- Identity Attestation:** Assignment of full (A), partial (B), or gateway (C) attestation based on direct verified ownership of originating telephone numbers and customer identity verification.

- **STI-Certificate Authority Integration:** Secure certificate issuance and management through approved Certificate Authorities linked to our active iconectiv database listing.
- **Interconnect Verification:** Comprehensive verification of SIP Identity headers across interconnecting upstream and downstream provider gateways.

4. TRAFFIC ANALYTICS & ABUSE PREVENTION

Policy Enforcement: Bentarix maintains a zero-tolerance stance against fraudulent caller ID spoofing, unallocated number generation, and illegal robocalling campaigns.

Bentarix utilizes continuous, automated network analytics to detect and mitigate malicious traffic in real time:

1. **Anomaly Detection:** Real-time monitoring of Call Detail Records (CDRs) for short-duration call bursts, low answer-seizure ratios (ASR), and calls originating from invalid, unassigned, or Do-Not-Originate (DNO) numbers.
2. **Automated Blocking & Isolation:** Immediate network-level blocking of calls flagged for illegal spoofing or non-compliant routing.
3. **Internal Suppression Lists:** System-wide maintenance of internal Do Not Call (DNC) lists and DNO databases.

5. INDUSTRY TRACEBACK & REGULATORY COOPERATION

Bentarix maintains active cooperation with the FCC, FTC, law enforcement, and the USTelecom Industry Traceback Group (ITG):

- **Traceback Responsiveness:** Official traceback requests are investigated and resolved within 24 hours of notification.
- **Designated Compliance Operations:** Direct compliance contact channels are maintained for rapid escalation and resolution of trace requests.
- **Audit & Cooperation:** Full commitment to supplying source IP logs, customer identification, and CDR records necessary to isolate malicious origination points.

6. AUTHORIZED REGULATORY & COMPLIANCE CONTACTS

For regulatory escalations, legal inquiries, or Industry Traceback requests:
