FCC REGULATORY REGISTRATION

FCC RMD ID:	RMD0039780
FCC FRN:	0038313276
499 Filer ID:	838934
Carrier OCN:	464M
iconectiv:	Registered / Active

1. Regulatory Statement & Scope

AuxiliaryIP Solutions LLC ("AuxiliaryIP") has established this Robocall Mitigation Plan (RMP) in full compliance with the directives of the Federal Communications Commission (FCC) under 47 C.F.R. § 64.6300 et seq. As a registered communications provider operating under **FRN 0038313276**, **FCC 499 Filer ID 838934**, and **OCN 464M**, AuxiliaryIP enforces technical and operational safeguards designed to prevent the origination, transit, and termination of illegal robocalls and spoofed voice traffic.

2. Customer Verification & Know Your Customer (KYC)

AuxiliaryIP enforces strict onboarding and identity verification protocols prior to granting network access or originating outbound voice traffic:

- Identity & Entity Validation:** Comprehensive verification of state incorporation records, physical office location in Denver, CO, D-U-N-S identifier (14-599-4438), and tax registration.
- Traffic Profile Auditing:** Review of expected calling patterns, campaign classifications, and verification that high-volume originators possess express written consent (TCPA compliance).
- Contractual Enforcement:** Customer agreements mandate strict prohibition against illegal caller ID spoofing and grant AuxiliaryIP immediate termination rights for non-compliant traffic.

3. STIR/SHAKEN Protocol & Attestation Standard

AuxiliaryIP has **Fully Implemented** the STIR/SHAKEN call authentication framework across its SIP infrastructure:

- Attestation Levels:** Full Attestation (Level A) is applied when AuxiliaryIP authenticates the originating customer and direct right-to-use for the telephone number. Partial (B) or Gateway (C) attestation is assigned strictly in accordance with FCC and STI-GA guidelines.
- Certificate Authority Integration:** Direct alignment with approved Certificate Authorities utilizing AuxiliaryIP's active registration in the iconectiv Service Provider Registry.

4. Traffic Analytics & Proactive Robocall Prevention

Compliance Policy: AuxiliaryIP actively screens network traffic to detect and block illegal call patterns, unallocated ANI generation, and unauthorized high-frequency robocalling in real time.

To ensure network integrity, AuxiliaryIP employs continuous automated monitoring:

- 1. Behavioral Pattern Analysis:** Real-time detection of high burst volumes, unassigned/invalid caller IDs, low duration metrics, and high call-completion failures.
- 2. Targeted Traffic Blocking:** Automated isolation and session termination for traffic streams exhibiting illegal spoofing characteristics.
- 3. Do-Not-Originate (DNO) Lists:** Strict enforcement of industry DNO databases and invalid number blocks.

5. USTelecom ITG & Industry Traceback Cooperation

AuxiliaryIP is committed to full, rapid cooperation with the USTelecom Industry Traceback Group (ITG), the FCC, state Attorneys General, and law enforcement agencies:

- 24-Hour SLA Response:** Traceback requests are processed and responded to within a strict 24-hour window.
- Upstream/Downstream Audit:** Complete capability to isolate source IP addresses, CDR logs, and customer identification for trace escalation.

6. Designated Regulatory & Operations Contacts

Role / Title	Contact Person	Direct Contact Information
Carrier Relationship Manager Primary Compliance Officer	Daniel Foster	Email: daniel.foster@auxiliaryip.com Phone: +1 720-206-2899
Corporate Headquarters	AuxiliaryIP Solutions LLC	1290 Broadway, Suite 320, Denver, CO 80203, USA D-U-N-S: 14-599-4438

7. Executive Certification & Affirmation

I declare under penalty of perjury that I am an authorized officer of AuxiliaryIP Solutions LLC and that I have examined this Robocall Mitigation Plan. The statements contained herein regarding network controls, STIR/SHAKEN implementation, and regulatory compliance under FCC RMD ID RMD0039780 are true, correct, and actively enforced.
