

Robocall Mitigation Plan

Company Name: Golden Teacher Ltd.

Date: May 8, 2026

FRN: 0038396941

We operate an internal B2B outbound dialing platform used only by our own sales team.

Our Robocall Mitigation Measures:

1. All calling lists are scrubbed daily against the National DNC Registry and state registries.
2. We honor all opt-out requests immediately.
3. Calls are only made between 8 AM and 9 PM local time of the called party.
4. All calls are recorded.
5. We use consistent and truthful Caller ID information.
6. We use SignalWire for STIR/SHAKEN attestation.
7. We monitor call metrics (ASR, short calls, complaints) and investigate any suspicious activity.
8. Only trained internal employees are allowed to use the platform.
9. We will fully cooperate with any traceback requests from the FCC or carriers.

We certify that we have implemented reasonable measures to prevent illegal robocalls.
