

TELEXPRESS COMMERCIAL CORP
Robocall Mitigation Program Description

TELEXPRESS COMMERCIAL CORP uses VoIP services exclusively for legitimate business communications and authorized commercial outbound calling activities.

The company has implemented reasonable measures to prevent the origination and transmission of illegal robocalls, including:

- Monitoring outbound call activity for suspicious patterns
- Restricting unauthorized use of calling systems
- Verifying customer and campaign legitimacy before activation
- Maintaining compliance with FCC and TCPA regulations
- Cooperating with traceback requests from authorized entities and law enforcement agencies
- Utilizing STIR/SHAKEN authentication through underlying voice service providers whenever applicable

TELEXPRESS COMMERCIAL CORP does not knowingly originate illegal robocalls, spoofed calls, or fraudulent telecommunications traffic.

The company is committed to responding promptly to traceback and mitigation requests related to suspicious call activity.
