Contact Telephone:	(734) 777-9008
Contact Email:	chapman@needtexting.com
Provider Classification:	Voice Service Provider (inbound only)
Date:	[INSERT DATE]

1. Overview and Nature of Service

Inspirational Data Holdings Inc (the “Company”) submits this Robocall Mitigation Program description in accordance with 47 CFR § 64.6305 and the Commission’s rules implementing the TRACED Act. The Company does not originate, generate, or transmit outbound voice calls of any kind, automated or otherwise. The Company’s voice-related activity is limited to receiving inbound telephone calls on assigned telephone numbers and forwarding those inbound calls to the cellular telephone numbers designated by the Company’s clients. The Company does not place outbound calls to consumers, does not operate autodialing or prerecorded-message campaigns, and does not provide voice origination services to third parties.

Because the Company does not originate outbound voice traffic, it presents no vector for the origination of illegal robocalls. This description is filed to document that fact and to certify the reasonable steps the Company takes to ensure its inbound-forwarding service is not used to facilitate illegal robocall traffic.

2. STIR/SHAKEN Implementation Status

The Company does not originate calls and therefore does not sign call traffic under the STIR/SHAKEN authentication framework. As the Company does not act as an originating voice service provider for outbound traffic, caller-ID authentication obligations applicable to originating providers are not implicated by the Company’s service. For inbound calls forwarded to client cellular numbers, authentication and verification are performed by the underlying originating and terminating carriers in the call path.

3. Reasonable Steps to Avoid Facilitating Illegal Robocall Traffic

Although the Company does not originate calls, it implements and maintains the following reasonable practices as part of its robocall mitigation program:

No outbound origination. The Company's service architecture does not include any outbound voice call origination capability. There is no dialer, no broadcast calling function, and no mechanism by which the Company or its clients can originate automated voice calls through the Company's systems.

Underlying carrier compliance. The Company obtains telephone numbers and call-transport services from upstream facilities-based carriers that are themselves subject to, and compliant with, the Commission's STIR/SHAKEN and robocall-mitigation requirements. Inbound traffic traverses these carriers' authenticated and monitored networks.

Know-your-customer practices. The Company maintains records identifying each client for whom inbound numbers are provisioned and forwarded, and provisions service only for legitimate, identified business purposes.

Monitoring and response. The Company monitors its inbound-forwarding service for indicators of abuse or anomalous usage and will suspend or terminate any service found to be used in connection with unlawful activity.

4. Traceback Cooperation Commitment

The Company commits to respond fully and in a timely manner, and in any event within 24 hours, to all traceback requests from the Commission, from law enforcement, and from the industry traceback consortium (currently USTelecom's Industry Traceback Group). The Company further commits to cooperate with those entities in identifying, investigating, and stopping any party that uses the Company's service in connection with illegal robocall traffic.

5. Point of Contact

All inquiries regarding this Robocall Mitigation Program, including traceback requests, may be directed to the robocall mitigation contact identified above.

Certification

The undersigned officer certifies, under penalty of perjury, that the foregoing is true and correct and that the Company has implemented the robocall mitigation program described above.
