1. STIR/SHAKEN Implementation

USB Voice has fully implemented STIR/SHAKEN protocols in accordance with FCC requirements.

2. Robocall Mitigation Practices

USB Voice actively monitors and mitigates illegal robocalls through:

- Traffic analysis and anomaly detection
 - Call authentication and verification procedures
 - Blocking or restricting suspicious outbound traffic
 - Rate limiting and fraud detection systems
-

3. Know Your Customer (KYC)

The company employs strict customer verification procedures, including:

- Identity verification
 - Business registration checks
 - Monitoring of call patterns after onboarding
-

4. Traceback and Enforcement

USB Voice cooperates fully with industry traceback efforts and responds promptly to requests from authorized entities.

5. Upstream and Downstream Providers

The company maintains relationships with telecommunications providers and ensures compliance with robocall mitigation obligations across all interconnected networks.

6. Ongoing Compliance

USBD Voice continuously updates its robocall mitigation program to align with evolving FCC regulations and industry standards.
