

Robocall Mitigation Program Description

Tekzop LLC | FRN: 0038639779 | Filed pursuant to 47 CFR § 64.6305

1. Company Overview

Tekzop LLC (“Tekzop” or “Filer”) is a Wyoming limited liability company that utilizes voice communications services solely for its own internal business operations. Tekzop does not offer voice or telecommunications services to any third party, affiliate, or member of the public. Tekzop is not a facilities-based carrier and does not itself originate calls onto the public switched telephone network (PSTN); rather, Tekzop's voice traffic is originated and carried by its upstream carrier(s), which are responsible for STIR/SHAKEN caller ID authentication under 47 CFR § 64.6301.

2. Measures to Prevent Illegal Robocall Origination (47 CFR § 64.6305(d)(ii))

- Tekzop's voice services are used exclusively by its own employees and officers for legitimate internal business communications. Tekzop does not sell, resell, or otherwise provide calling capability to any external customer, subscriber, or third party.
- Because Tekzop has no external customer base originating traffic through its systems, there is no customer-facing onboarding, verification, or “know-your-customer” process applicable to third-party originators; Tekzop itself is the sole user of the service.
- Tekzop selects and contracts only with established upstream carriers that maintain their own robocall mitigation programs and STIR/SHAKEN implementations.
- Tekzop does not engage in telemarketing, autodialed calling campaigns, or any bulk or robocall activity.

3. Measures to Identify and Respond to Traceback Requests (47 CFR § 64.6305(d)(iii))

- Tekzop commits to responding fully and within 24 hours to all traceback requests received from the Commission, law enforcement, and the industry traceback consortium (USTelecom Industry Traceback Group).
- Tekzop designates its Robocall Mitigation Contact, identified in this filing, as the primary point of contact for all traceback and mitigation-related inquiries.
- Tekzop will cooperate fully with the Commission, law enforcement, and the industry traceback consortium in investigating and stopping any illegal robocalls or spoofing suspected to involve Tekzop's service, including promptly providing upstream carrier information upon request.
- Should Tekzop identify or receive credible reports of misuse of its service to originate illegal robocalls or spoofed calls, Tekzop will promptly investigate and take corrective action, including terminating the responsible internal user's calling privileges and notifying its upstream carrier.

4. STIR/SHAKEN Implementation Status

Tekzop has not implemented the STIR/SHAKEN caller ID authentication framework directly, as Tekzop does not itself originate calls onto the PSTN. Tekzop's upstream carrier(s) serve as the originating provider(s) for purposes of 47 CFR § 64.6301 and are responsible for STIR/SHAKEN implementation with respect to calls originated on Tekzop's behalf.

Certification

The undersigned certifies that the foregoing accurately describes Tekzop LLC's robocall mitigation program as of the date of this filing.
