2. Business Overview

Gulf Telecom Inc. operates as a telecommunications service provider specializing in VoIP routing, SIP Trunking, Premium local and Toll-Free DID numbering services, and enterprise voice communications. The company maintains industry best practices and regulatory compliance through its subscriptions and use of services provided by the Tier-1 underlying carriers we use to serve our Clients.

3. Network Architecture and Traffic Flow

Traffic is accepted only from verified customers and upstream carriers, authenticated using SIP credentials and IP authorization, monitored continuously by our upstream providers and routed through secure VoIP infrastructure.

4. Robocall Mitigation Framework

- Caller ID validation and anti-spoofing controls in place provided by our underlying providers.
- Complete STIR/SHAKEN support provided by our underlying providers.
- Blocking of invalid or suspicious numbers via our underlying providers.
- Rate limiting and fraud detection services via our underlying providers.
- Continuous monitoring and alerting services via our underlying providers.

5. Customer Onboarding & KYC

Identity verification, business and payment medium validation, acceptable use agreements.

6. Traffic Monitoring & Enforcement

Real-time traffic analysis, fraud detection, suspension of abusive traffic, and audit log retention via our underlying providers, should it become necessary to assist with any investigation(s).

7. Traceback & Cooperation

Gulf Telecom Inc. cooperates with traceback requests from US Telecom, carriers, and regulators, providing information and records which may be required for investigations.
