

Talknex.ai — FCC Robocall Mitigation Database (RMD)

Filing Reference & Preparation Guide

This document is a practical preparation guide based on the FCC's current Robocall Mitigation Database (RMD) materials and the Talknex business model described in this conversation. It is not a substitute for FCC legal advice or a determination by the FCC of Talknex's regulatory status.

Talknex business model described

Talknex plans to obtain U.S. telephone numbers and SIP/voice connectivity from different third-party voice providers and select providers based on business requirements and pricing. Talknex does not intend to operate its own underlying U.S. carrier network or implement its own STIR/SHAKEN authentication infrastructure.

Fields discussed in the RMD filing

Field	Preparation
Prior formal action / investigation	Select No only if the filing entity has not been subject to the type of formal action described by the FCC.
Operating Company Number (OCN)	Select No if the filing entity does not have an OCN.
Voice Service Provider Role	Select the role that accurately describes Talknex's actual position in the call chain. Do not select a role that does not apply.
STIR/SHAKEN certification	The selected certification must accurately describe Talknex's own network and implementation status.
Robocall mitigation program	Prepare a truthful description of the measures Talknex actually uses to prevent and address illegal robocalls.

Important point about Option 3

Option 3 is a certification of **No STIR/SHAKEN Implementation**. The FCC form also asks the filer to state the rule that exempts the filer from STIR/SHAKEN compliance and explain why the exemption applies. That explanation must match the filing entity's actual facts. A third-party carrier arrangement by itself should not be treated as an automatic exemption without confirming the applicable FCC rule.

Current FCC materials

The FCC's current RMD materials require providers to submit accurate certifications and robocall mitigation information. The FCC has also stated that inaccurate RMD information can result in enforcement consequences.

Official FCC RMD filing instructions
