# AUD LLC

Robocall Mitigation Program Description
Federal Communications Commission Robocall Mitigation Database

AUD LLC (“AUD” or “the Company”) is a Maryland limited liability company formed on October 29, 2026, serving customers in the United States. AUD is a voice service provider within the meaning of Section 64.1200(f)(9) of the Commission’s rules and submits this robocall mitigation program description in accordance with Section 64.6305 of the Commission’s rules.

## STIR/SHAKEN Implementation Status

AUD is a newly organized provider that has not yet commenced commercial voice operations. Its network is in the provisioning stage and STIR/SHAKEN caller ID authentication has not yet been implemented. AUD intends to implement full STIR/SHAKEN signing and verification in all portions of its network before carrying live customer traffic.

## Interim and Ongoing Robocall Mitigation Practices

Until full STIR/SHAKEN implementation, and on an ongoing basis, AUD employs or will employ the following measures to prevent, detect, and mitigate unlawful robocalls:

1. **Upstream authentication.** AUD obtains service from reputable upstream voice providers that implement STIR/SHAKEN caller ID authentication in their own networks.
2. **Customer diligence.** AUD performs know-your-customer diligence on end users and resellers, collecting and verifying business identity information before provisioning service.
3. **Traffic monitoring.** AUD monitors traffic patterns for suspicious volume or anomalies, investigates customers reasonably suspected of transmitting unlawful robocalls, and suspends such customers where appropriate.
4. **Blocking.** AUD blocks calls where there is a good-faith basis to believe they are unlawful, consistent with Section 201 of the Communications Act and Section 64.1200 of the Commission’s rules.
5. **Traceback cooperation.** AUD fully cooperates with traceback requests from the Industry Traceback Group, law enforcement, and the Commission, and responds promptly to notifications regarding suspected illegal traffic originating from, transiting, or terminating on its network.

## Contact Information

The primary contact for traceback and mitigation matters is Jonathan Audy, Managing Member, at the contact information provided in this Robocall Mitigation Database filing.
Executed on November 19, 2026.
